In this Tones Bass Pro Admin Interface, you can change setting of the website, browse and send message from community and more.--- author: - 'H. Caltagirone[^1]' title: 'Hadronic decays of  $\eta$  and  $\eta'$  at the LHC' --- Decay modes of  $\eta$  and  $\eta'$  =====  $\eta$  and  $\eta'$  are the members of the so-called pseudo-scalar meson nonet consisting of the  $SU(3)_f$  singlet (or axial-vector, neutral)  $\eta_0$ , the triplet  $\eta_8$ , and  $\eta_1$  admixtures of  $SU(3)_f$  singlet and octet states [1]. Until recently the only experimental information about  $\eta$  and  $\eta'$  were the partial widths for hadronic decay which in general only constrain the  $SU(3)_f$  singlet component of  $\eta$ . Now LHCb experiment has observed three hadronic decay modes of the  $\eta$ :  $\pi^+\pi^-\eta$ ,  $K^+K^-\eta$ , and  $\rho^0$

### What's New in the?

Change the way you see the world. Consistent effort and vision Have you ever heard a song and found yourself playing the same thing over and over? In your head, perhaps, but certainly not on your instrument. InTone Bass Pro is a complete arrangement tool that keeps you in a state of harmony, rather than a state of discord. With a steady, consistent effort and vision, you will be able to be more creative and achieve greater output. High-quality recording Mixing can be an arduous task but inTone Bass Pro is designed to make it more efficient, allowing you to be in control of pitch, tempo, volume, and instrument placement from the outset. Featuring four exclusive recording modes, you can capture and simultaneously mix your performance in a broad range of quality and complexity, all from a simple drag-and-drop interface. Interactive mixing It goes without saying that the constant presence of a workstation-class processor in your device will have a noticeable impact on the quality of your recordings, but what's truly impressive about inTone Bass Pro is the way it can be custom-tailored to suit your needs. The interface comes with a number of built-in microphones and audio inputs and outputs that make it easy to connect to all your mixing, monitoring and recording equipment, and be able to integrate everything seamlessly. InTone Bass Pro will also let you preview the performance on any one of the four recording devices you select, providing you with a preview of each section of the song, including the intro, verse, chorus, bridge, and outro, to make it a seamless process. Using the four modes described earlier, you can record, mix, or even playback the entire song and complete setup before starting a session. Seamless mixing with preview The powerful audio engine in inTone Bass Pro will bring your mixing to life by giving you the opportunity to preview how your song will sound each time you open it. This means you can begin working with your sound immediately, rather than starting from scratch every time. When you're recording, you can set up the entire song's mix in under a minute. Record and mix with ease Thanks to inTone Bass Pro's layout, you can use the tool for performing, recording or recording and mixing. Its intuitive interface makes this simple for beginners with little or no experience with using a multi-track workstation to get a solid, professional-quality performance. InTone Bass Pro Features:
